

Aquatan (Pty) Ltd (Aquatan) is a Specialist Contracting Company, supplying and installing a variety of Geosynthetic and Specialist Geosynthetic materials in a diversity of application in the Engineering Industry.

Aquatan is committed to exceeding customer expectations by achieving the highest standard of Quality and Service within the Geosynthetic Industry.

Aquatan applies the best available Geosynthetic materials meeting the project specifications and install it using state of the art installation methods and equipment.

Aquatan's Quality Control System is implemented by applying proprietary Cloud based technology (AQ-Cloud®) which ensure accurate recording of data and apply trusted state of the art test methods.

Aquatan complies with the ISO 9001 International Standard which specifies the requirements for a Quality Management System. ISO 9001 enables Aquatan to consistently,

- Provide products and services that meet and exceed Customer and Regulatory requirements.
- Conforms to and executes the Health & Safety Act.
- Meets Legislative Regulations
- Comply with internal policies

Aquatan always maintains environmental awareness.

Aquatan strives to perform all its activities in a professional and responsible manner.

The Aquatan Integrated Management System (AIMS) is continuously improved by addressing the following objectives:

- a. Supply a final product within the contractual parameters of the material and the workmanship to meet the quality, program and cost parameters of the project.
- b. Recognize the protection of the Environment as a priority during the material installation process up to the completion of the final product.
- c. Respect and enhance customer relations by providing our services appropriate to contractual requirements.
- d. Promotes a high level of Health & Safety awareness amongst the employees.
- e. Constantly improve installation methods, site operations and technical skills of employees by on-going training and skills development.
- f. Maintain awareness of social responsibilities.
